

MorphoTrust USA

THE IDENTITY COMPANY

The Leading Provider of Identity
Solutions and Services in the U.S.

MorphoTrust USA
A Safran Company

MorphoTrust USA

Our Mission

Our mission is to Simplify, Protect and Secure the lives of the American people.

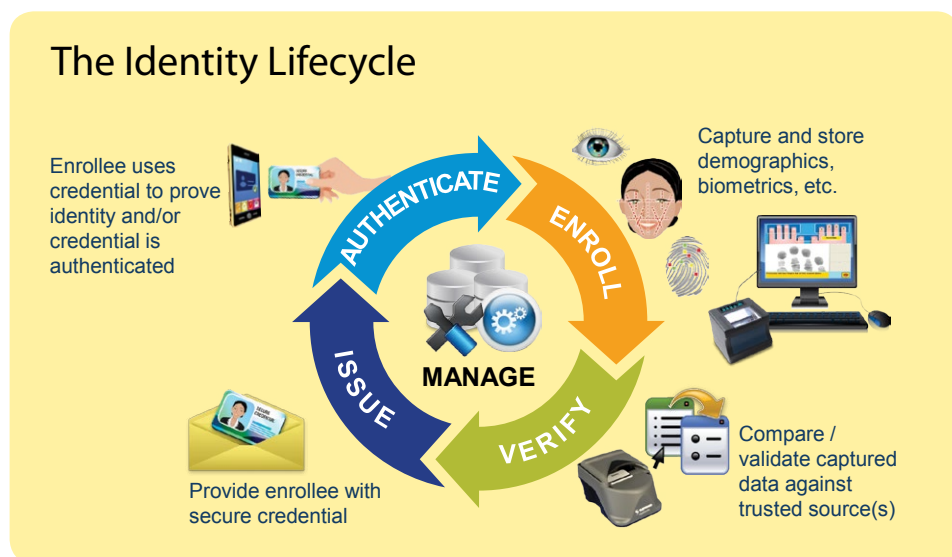

We know identity; and we deliver the products, solutions and services that establish individual identities as well as verify that people are who they claim to be.

We proudly serve both state and federal government agencies, as well as commercial businesses – empowering them to ensure trusted transactions and commerce, reducing risk and enhancing security and convenience – all while protecting the privacy and identities of Americans.

**TO SIMPLIFY, PROTECT AND SECURE
THE LIVES OF THE AMERICAN PEOPLE**

Leadership Spanning the Entire Identity Lifecycle

MorphoTrust's offerings span the entire identity lifecycle – Enroll, Verify, Issue and Authenticate. For more than five decades, we have led our markets with innovative products and technologies, and continue to invest in R&D to anticipate the needs of tomorrow.

Enroll: We provide enrollment solutions that facilitate the capture and secure storage and/or transmission of biographic data and biometric images (face, iris, finger and palm prints) from applicants. We operate over 1,100 IdentoGO® Centers nationwide, offering live scan fingerprinting and other identity-related products and services, including TSA Pre ✓®.

Verify: The characteristics of an individual's identity can be described as "Something you have" (an identity document like your driver license), "Something you know" (information or answers to questions that only you could provide), "Something you are" (your biometrics). Our solutions verify identity, and include Biometric Identification, Document Authentication and Data Verification, needed to support the process of vetting or qualifying applicants and employees.

Issue: Today, we provide driver license and ID (DL/ID) issuance solutions to 42 of 50 states. This includes both front- and back-office solutions that cover the entire secure ID lifecycle. We employ some of the world's experts who design highly secure credentials that stay one step ahead of criminals and fraudsters.

Authenticate: Once the applicant has been cleared and a credential issued, many stakeholders need the ability to reliably authenticate the document at points of inspection. This includes airports, border crossings, and financial institutions, as well as in healthcare, education, rentals, and many more situations requiring confidence that an individual is who he/she claims to be, and their proof-of-identity credential is authentic.

MorphoTrust credential production facility is the first and only in the world to achieve Class 1 certification

When Identity Matters

3 Million

MorphoTrust customers enroll at 1,100 IdentoGO Centers every year

IdentoGO[®]
By MorphoTrust USA

IdentoGO Centers offer identity-related services such as TSA Pre✓[®] fingerprinting, background checks, passport photos, notary services, State and Federal criminal history checks and much more.

From convenient, professional enrollment services for employees and applicants, to quickly identifying threats to our nation's security, MorphoTrust delivers leading solutions whenever identity is at the core. Given the trusted nature of our business, we are uniquely governed by Proxy and National Security Agreements to ensure the highest levels of security in every area of our business. Our standards for protecting all personally

identifiable information are unmatched; and, today, we are the preferred partner for agencies in all 50 states, and many federal agencies, including the Department of Defense, the Department of State, and the Department of Homeland Security.

As part of our end-to-end identity solutions, we enable efficient multi-agency interaction and collaboration where identity verification is essential.

US citizens are currently enrolled in TSA Pre✓[®]

A Trusted Partner

Working closely with TSA securing our nation's transportation systems for

16 Years

Our flexible, scalable solutions support the applicant vetting process, including the capture of data and biometrics that can be used to establish a trusted identity record, as is the case with the U.S. driver license. Given the level of trust in the driver license database, there is significant benefit for other agencies to be able to query and leverage this asset to confirm individual identity.

MorphoTrust® idFabric facilitates approved queries between data sources to validate certain identity attributes, effectively enabling data and information sharing while maintaining separate databases and without the actual transfer of data. This supports a risk-based approach and improves accessibility to services while aiding public safety officials and reducing fraud.

34 Years

Providing advanced identity solutions as a trusted partner with the FBI

idFabric is the innovative platform solution that dynamically enables the sharing of identity assets across agencies to drive efficiencies and cost savings.

A Responsive Partner

Government agencies have come to rely on us for advanced multi-modal biometric solutions to ensure the accurate and immediate identification of persons of interest in areas of conflict, prisons, secured areas, and more.

MorphoTrust® ABIS®, automated biometric identification system, is a software platform for managing identity with business process management, identity record keeping, verification, de-duplication and identification functionality. ABIS is fully configurable. It processes, stores, creates, searches, and compares biometric identity records using face, iris, fingerprint and palm prints, with the ability to easily add new modalities in the future.

MorphoTrust® Identix® is an identification and authentication platform with multi-modal capabilities that adds the benefits of a cloud-based environment with enhanced scalability and interoperability, reduced costs, improved efficiency, and a much faster, easier process for managing system upgrades.

MorphoTrust is a global leader in biometric technologies with some of the largest operational deployments in the world. Several programs now have enrollments exceeding 200 million images, providing our customers with the ability to successfully identify and prevent thousands of fraud cases each year.

MorphoTrust is taking the capabilities and functions of multi-modal biometrics to the cloud with its next generation Identix solution.

34

motor vehicle agencies, the FBI, the U.S. Department of Defense, and the U.S. Department of State rely on MorphoTrust multi-modal biometric solutions.

ABIS® Search Engine provides biometric processing services based on MorphoTrust's top-rated algorithms for face, iris, fingerprint and palm print recognition, as well as support for third-party algorithms.

Services in All 50 States

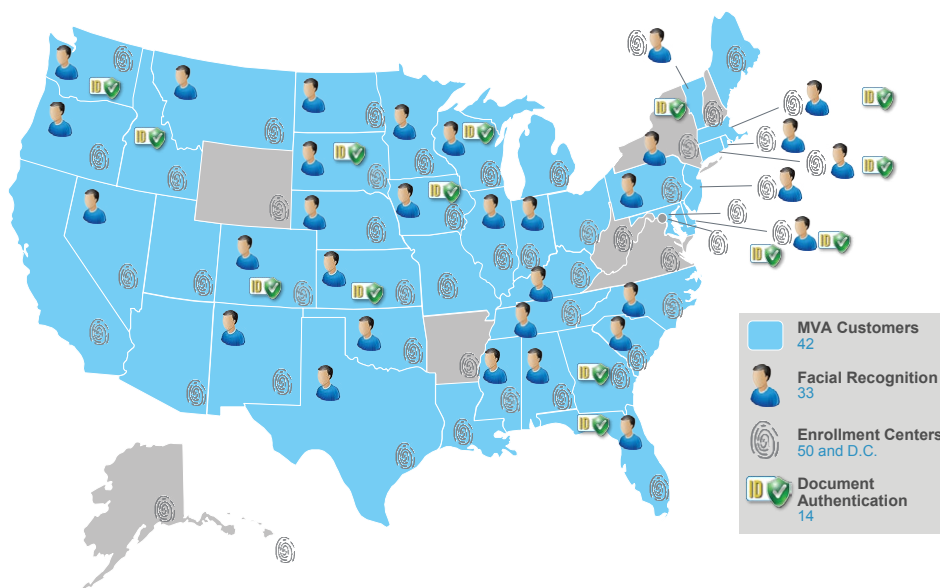

MorphoTrust serves customers across the nation, providing deep expertise in identity solutions and services. We help ensure trusted identities to enable trusted transactions. Through the use of advanced biometric technology, individuals and organizations can increase their capabilities beyond traditional crime solving to that of enhanced security, convenience and service. It is transforming the way we conduct business and will provide the foundation for new service models in the future.

We Did It First:

In your business, it is critical that you know your customers, your applicants and your employees. This reduces business risk, improves security, and helps you retain your top customers.

- Digital IDs
- Centrally issued IDs
- Biometric-secured IDs
- Self-service kiosk for driver license renewal
- Implementation of facial recognition software
- Digital watermarking as a covert security feature in driver licenses
- RFID proximity passport and border crossing cards
- Enhanced driver licenses for land and sea border crossing
- REAL ID compliant solution
- Document authentication for government and financial applications
- Large-scale commercial Automated Biometrics Identification System (ABIS)
- Moisture discrimination in fingerprint device collection
- Commercially viable, mobile, untethered tri-modal biometric capture device
- Electronic transmission of civil fingerprints to the FBI
- Electronic fingerprinting network for the U.S. military
- First credential production facility ever to receive NASPO Class 1 Certification, the highest security certification offered

Our technologies are continually recognized for superior accuracy and performance as demonstrated by the independent reports issued by the National Institute of Standards and Technology (NIST) and our 2013 award as "Biometrics Company of the Year" by Frost and Sullivan.

MorphoTrust USA

Simplifying, Protecting and Securing the Lives of Americans

Our desire is to be a trusted partner for all our customers. This means when we make a commitment to a program we see it through to the end, always focused on meeting timeline and budget targets. If any issues or concerns arise, we work with you to resolve them as quickly and efficiently as possible. We have never walked away from a contract. We work with you to ensure every program is delivered fully and successfully, and that our partnerships are rooted in long-term commitments to quality, design, implementation excellence, continuous innovation and customer service.

As the leading provider of identity solutions in the U.S., no other company knows state motor vehicle agencies better than we do. We have proudly served our customers for over 50 years, with more than six billion transactions for driver services alone. At any moment in time, over 200 million Americans carry driver licenses or IDs produced by our solutions and we have led the way through every major innovation and industry "firsts."

MorphoTrust Solutions

All MorphoTrust solutions are built using the latest technologies and devices, with scalable, flexible platforms that meet your needs today and allow you to add features, capabilities and applications as you desire in the future. We maximize your investment by delivering proven, market-leading solutions and components that are fully customized for your unique environment.
